

GenAI Conversation Starters

Generative AI tools like ChatGPT, Gemini, Claude, and others are quickly becoming part of how young people learn, search for information, and create online. FOSI research shows that many teens are already using generative AI, often without clear family rules about how it should be used.

Because the technology is evolving quickly, it is important to have regular conversations with kids and teens about how these tools work and how to use them responsibly in their academic, social, and creative lives.

USE THE QUESTIONS BELOW TO START THE CONVERSATION:

Talk About AI Use

- Have you heard your friends or teachers talk about generative AI? What do they say about it?
- Have you ever used tools like ChatGPT? What did you use them for?
- Have you used generative AI for homework or school assignments?

Talk About How AI Works

- Do you know where AI-generated answers come from?
- How can you tell if the information an AI tool gives you is accurate?

Talk About Boundaries

- How do you think generative AI can help with school or projects?
- How might it cause problems at school?
- Are there certain things we should or shouldn't use AI tools for?

Talk About the Future

- What excites you most about generative AI?
- What concerns you the most about it?
